

# Staging Testimonials For The **Realtor's Assistant**

Elizabeth's staging made a huge difference in how the home was viewed and evaluated. She did wonders with my home with her creative flair. There are so many buyers who cannot visualize, it really brings the feeling of home to their attention, giving them a boost to buy our house.

- Concord, NC Homeowner

Beth, you have done a wonderful job on the two listings you staged for me. Your professionalism and creative vision transformed otherwise average homes into showcase listings. Your professionalism and willingness to go beyond what is required is what sets you apart, and my clients rave about you. Phenomenal job!

- Keller Williams Realtor

Sale pending, but we have had at least 10 showings and our house was only put on the market less than a month ago (between Thanksgiving & Christmas). Each showing commented on how wonderful the house showed which I know is a direct reflection of Ms. Skipper's staging. My husband and I found Ms. Skipper's talent and professionalism exceeding anything we would have ever expected. We had never staged a home before but it was unbelievable how she transformed our home into the showplace that was created. Her pricing was extremely fair and one is left with a feeling that you got more than you paid for. It would be with no hesitation that we would recommend her to anyone desiring to stage and market their home.

- Cooper Family, Charlotte, NC – Homeowners

All I can say is Wow! I was amazed at the difference Elizabeth made with my listing! I had tried everything, but the home just wasn't showing well. Elizabeth drove out to the home with me and, with her direction and assistance, four rooms and a hallway were completely transformed in only two hours! I had listed the home without The Realtor's Assistant for several months prior, and the feedback from showings was always negative. After her staging changes, the home showed so dramatically differently, we ended up taking new photos for the MLS! I never thought professional staging was necessary, but after this experience I'm convinced!
